

Curriculum Vitae

Michel Duprez

Inria Junior Researcher

Team-project Inria MIMESIS
MLMS Team, Icube
Université de Strasbourg
2, rue Marie Hamm
67000 Strasbourg
✉ michel.duprez@inria.fr
🌐 michelduprez.fr
Born 15 April 1985
French citizenship

Professional experience

- 2020 – **Inria Junior Researcher** *Inria Nancy Grand-Est team-project MIMESIS, laboratory Icube team MLMS, Université de Strasbourg*
- 2019 – 2020 **Assistant professor** *CEREMADE, MIDO, Université Paris Dauphine.*
- 2018 – 2019 **Post-doc position** *LJLL Sorbonne Université*
Supervisors: Yannick Privat and Grégoire Nadin. Subject: “Optimisation problems arising in biology”.
Supported by Fondation Sciences Mathématiques de Paris.
- 2016 – 2018 **Post-doc position** *I2M, LSIS Université Aix-Marseille*
Supervisors: Francesco Rossi and Morgan Morancey. Subject: “Control problems arising in crowd motion”.
Supported by Labex Archimède.
- 2015 – 2016 **Full-time ATER (assistant professor)** *LMB, Université de Franche-Comté, France*
Duration: 192h.
- 2012 – 2015 **Teaching contracts** *UFR-ST, Université de Franche-Comté, France*
Duration: 3×64 h.

Education

- 2025 **Habilitation à Diriger des Recherches (French accreditation to supervise research)** *Université de Strasbourg, France.*
Subject: A priori and a posteriori estimates of finite element schemes and development of commands for some dynamic phenomena.
Defended on November 21, 2025.
- 2012 – 2015 **Ph.D. in Applied Mathematics** *Université de Franche-Comté, France.* Advisers: Farid Ammar Khodja, Boris Andreianov and Franz Chouly
Subject: Controllability of some systems governed by parabolic equations.
Supported by Région Franche-Comté.
Defended on November 26, 2015.
- 2011 – 2012 **Master of research: partial differential equations and numerical analysis** *Université de Franche-Comté, France*
Subject: Approximate controllability, optimization and numerical convergence of a scheme for parabolic linear equations.
- 2011 **Agrégation of Mathematics (French national competitive examination)**
Rank: 146th.
- 2010 – 2011 **Master of Professional Studies “History of science”** *Université de Franche-Comté, France*
Adviser: Stefan Neuwirth. Subject: “Les Sphériques de Ménélaüs”.

2010 **Capes of Mathematics (French national competitive examination)**
Rank: 58th.

Research interests

Optimal Control Problems Applied to Biology and Medicine

Epidemiology, neuroscience, modelling, optimisation

Development of numerical tools for soft tissue simulation

Finite element method, neural networks, a priori estimates, a posteriori estimates

Distinctions

2025 – 2027 **RIPEC C3**

2020 – 2023 **PEDR** *Inria Starting*

Grants and projects

2026 – 2027 **Principal investigator of the CNRS-MITI project OPTISTENT** “*Designing patient-specific stents by shape optimisation*”. Budget: 40 k€

2026 – 2027 **International coordinator of the MATH-AmSud project NeuralFEM** “*Certified neural networks for non-smooth biomechanical problems*”. Consortium of 16 researchers (Uruguay, Colombia, Chile, France). Budget: 48.5 k€

2024 – 2029 **Participant in the project PREMYOM** “*Personalised myopia-control lenses and care pathway, digital twin of the myopic eye*”. Leader: Essilor.

2023 – 2028 **Participant in the project MEDITWIN** “*A European and sovereign platform of digital twins for healthcare*”. Leader: Dassault Systèmes. Budget: 132 M€

2022 – 2026 **Principal investigator of the project ANR JCJC ϕ -FEM** “ *ϕ -FEM: development of a Finite Element Method for the design of real-time digital twins in surgery*”. Budget: 320 k€

2022 – 2026 **Participant in the project ANR S-KELOID** “*Understanding Keloid Disorders: A multi-scale in vitro/in vivo/in silico approach towards digital twins of skin organoids on the chip*”. Leaders: R. Eftimie (France) and S. Bordas (Luxembourg) Budget: 575 k€

2021 – 2025 **Participant in the project ANR TRECOS** “*New TREnds in COntrol and Stabilization*”. Leader: S. Ervedoza Budget: 300 k€

2018 **Participant in the project STIC-AmSud MEMBICA** “*NEw Methods for BIological Control of the Arboviruses*”. Leader: P.-A. Bliman Budget: 15 k€

Supervision

Post-docs

- 2024 – **Raphaël Bulle:** co-supervised with V. Lleras and R. Becker. “A posteriori error estimators for immersed boundary methods”

Ph.D. students

- 2025 – **Louis Ducongé:** co-supervised with Y. Privat and S. Cotin. “Designing patient-specific stents by shape optimisation”
- 2025 – **Even Harsigny:** co-supervised with P. Alvarez and S. Cotin. “Building a digital twin of the eye to fight myopia”
- 2025 – **Ilias Nahmed:** co-supervised with P. Alvarez and S. Cotin. “Computer-assisted liver tumour ablation using an AI-based digital twin”
- 2025 – **Francesco Dettori:** co-supervised with P. Alvarez and S. Cotin. “Image registration for liver tumour ablation using an AI-based digital twin”
- 2023 – **Frédérique Lecourtier:** co-supervised with V. Lleras and E. Franck. “Finite element methods and neural networks for augmented surgery”
- 2022 – **Killian Vuillemot:** co-supervised with V. Lleras and B. Mohammadi. “Non-conforming finite element methods for the design of digital twins of organs”
- 2021 – 2024 **Valentina Scarponi:** co-supervised with F. Nageotte and S. Cotin. “Catheter insertion”
- 2021 – 2024 **Thomas Wahl:** co-supervised with A. Hutt. “Model-based closed-loop neurostimulation with application to schizophrenia”

Master students

- 2025 **Francesco Dettori (M2), Even Harsigny (M2), Louis Ducongé (M2), Ilias Nahmed (M2) and Tom Pitois (M1)**
Co-supervised with S. Cotin, P. Alvarez, Y. Privat, Y. Dumont, P. Rastin and G. Cabanes.
- 2024 – 2025 **Justine Ehret and Rénée Portillo-Navarrete (M2 mini-project):** co-supervised with S. Cotin and P. Alvarez. “Muscle activation in the eye”
- 2024 **Francesco Dettori (M1):** co-supervised with S. Cotin and F. Nageotte. “FBG tracking for catheter navigation”
- 2023 **Frédérique Lecourtier (M2):** co-supervised with E. Franck and S. Cotin. “Finite element methods and neural networks for augmented surgery”
- 2022 **Killian Vuillemot (M2):** co-supervised with S. Cotin. “Developing non-conforming finite element methods for computer-assisted surgery”
- 2021 **Vincent Italiano (M1):** co-supervised with Y. Privat. “Epidemic control strategies”
- 2021 **Philippe Pincon (M2):** co-supervised with F. Jourdes. “Updating sparse Cholesky factorisations in the context of interactive surgical simulation”
- 2021 **Killian Vuillemot (M1):** co-supervised with S. Cotin. “Developing non-conforming finite element methods for computer-assisted surgery”
- 2020 – 2021 **Philippe Pincon (M2 mini-project):** co-supervised with F. Jourdes. “Assessing approaches to organ–organ interaction for surgical simulation”
- 2020 – 2021 **Roussel Nzoyem (M2 mini-project):** co-supervised with S. Cotin. “Simulating soft tissue with innovative non-conforming finite element methods (ϕ -FEM)”
- 2019 **Romane Hélie (M2):** co-supervised with Y. Privat. “Control strategies for fighting arboviruses”

Scientific responsibilities

- 2021 – **Organiser of the MLMS and MIMESIS team seminar** *Strasbourg*
<https://mlms.icube.unistra.fr/en/index.php/Seminars>
- 2022 – **Member of the centre committee** *Inria Nancy Grand Est centre*
- 2022 **Member of the hiring committee for Inria junior researchers** *Inria Nancy Grand Est centre*
- 2014 – 2016 **Ph.D. student representative** *Carnot-Pasteur doctoral school, Bourgogne Franche-Comté*
- 2014 – 2016 **Head of the Ph.D. student seminar** *LMB, Besançon*
Reviewer for *SEMA SIMAI, Journal of Differential Equations, Systems & Control Letters, ESAIM: COCV, Mathematics of Control, Signals and Systems, IEEE Transactions on Control Systems Technology, Journal of Dynamical and Control Systems, North Western European Journal of Mathematics, Evolution Equations & Control Theory, Advanced Modeling and Simulation in Engineering Sciences, Radon Series on Computational and Applied Mathematics, Mathematical Control and Related Fields, Nonlinear Analysis: Real World Applications.*

Preprints

- [A38] R. Bulle, M. Duprez, V. Lleras, K. Vuillemot. A multigrid and neural network approach to reduce the computational cost of ϕ -FEM.
- [A37] R. Bulle, M. Duprez, V. Lleras, K. Vuillemot. A penalized ϕ -FEM scheme for the Poisson Dirichlet problem.
- [A36] R. Becker, R. Bulle, M. Duprez, V. Lleras. Residual-based a posteriori error estimates with boundary correction for ϕ -FEM.

Accepted articles

- [A35] F. Dettori, I. Nahmed, M. Duprez, J. Verde, P. Alvarez, S. Cotin. Personalization of Liver Microwave Ablation Simulation. *Int. J. Comput. Assist. Radiol. Surg.* (2026)

Oral presentations

30 oral communications in conferences with personal invitation

37 oral communications in seminars or workshops with personal invitation

Teaching

- 2023 – 2024 **Optimal control, lectures and exercises (28h)** *MSc 2 CSMI, Université de Strasbourg*
Optimisation, lectures and exercises (28h) *MSc 1 CSMI, Université de Strasbourg*
Uncertainty quantification, lectures and exercises (8h) *MSc 2 CSMI, Université de Strasbourg*
Scientific computing, lectures and exercises (10h) *MSc 2, agrégation preparation, Université de Strasbourg*
- 2022 – 2023 **Uncertainty quantification (17h), scientific computing (16h), numerical analysis techniques 2 (10h)** *Université de Strasbourg*
- 2021 – 2022 **Uncertainty quantification (17h), numerical analysis techniques 1 (17h) and 2 (10h)** *Université de Strasbourg*
- 2020 – 2021 **Uncertainty quantification (17h), computer science (34h), numerical analysis techniques 1 (17h) and 2 (10h)** *Université de Strasbourg*
- 2011 – 2016 **Algebra, analysis, mathematics, numerical methods, approximation and signals, optimisation and linear programming** *Université de Franche-Comté and ISIFC engineering school*
From BSc 1 to MSc 1, lectures, exercise classes and computer labs.

IT and languages

- IT **Python, Maple, Matlab, Scilab, FEniCS**
- Languages **French (mother tongue), English and German (good level)**
